

Gemhog is a podcast player for investors. It shows which companies investment podcasts suddenly talk about, and the strongest arguments for and against them.

Gemhog listens to investment podcasts and takes listeners to the episodes that matter. It shows which companies are suddenly discussed far more than usual and why, puts the strongest bullish and bearish takes on a company side by side, and points to deep dives on whole industries. Gemhog is a podcast player first and gives no investment advice.

HEATING UP

Gemhog knows how often each company usually comes up. When the talk jumps, it shows the reason and the episode to start with.

STRONG TAKES

Single episodes with a clear, well-argued opinion, bullish and bearish, side by side for every company.

DEEP DIVES

Longer conversations about a sector or theme, like defense, robotaxis or e-commerce.
